
COMPLETE SYSTEM FLOWCHART

VMS Tender Portal Complete Action Flow

Vinayaka Mission's Research Foundation — Vendor Management System

☐ Action / state change ☐ Decision point ○ Automatic email

Every action, decision point, and automatic email trigger currently implemented in the system — traced directly from the controllers: registration & approval, tender creation & auto-publish, vendor application & eligibility screening, review & award, optional contract signing, closure, and the public API already ready for a future mobile app / university-site feed.

The diagram is on the next page, sized as a single large-format sheet for full-resolution viewing.

Vendor visits the portal
Self-registers: company details, GST, documents
Account created — status: Pending
email
Admin notified: new vendor pending
Admin reviews registration
Approve
Vendor Active — can log in & apply
email
